

ACADEMIC & STUDENT INFORMATION HUB

PRIISMS Online

One secure cloud platform for the complete student lifecycle.

From application and enrollment through graduation and alumni records — PRIISMS Online unifies admissions, registrar, scheduling, grades, and portals on a single authoritative record, built for Philippine institutions.

01

Admissions

Applicant to acceptance

02

Enrollment

Instant, conflict-free registration

03

Registrar

One secured records vault

04

Portals

Students, parents & faculty

01 THE PLATFORM

One record for the entire student lifecycle

PRIISMS Online is the academic and student information hub of the Smart Campus ecosystem. Student data scattered across spreadsheets and disconnected programs forces repeated encoding and conflicting versions of the same record — PRIISMS replaces all of it with one authoritative system, from the first application form to the alumni directory.

Why institutions choose PRIISMS Online

Complete Student Lifecycle
Admissions, enrollment, registrar, grades, clearance, and alumni records — one system, one record, no re-encoding.

Philippine Compliance, Built In
Structured DepEd, CHED, and UniFAST report generation — prepared from live records, not spreadsheets.

Real-Time Finance Sync
Assessments and student ledgers push to cashier counters and PFMS the moment enrollment happens.

Self-Service Portals
Students, parents, and faculty see schedules, grades, balances, and announcements — without lining up at the registrar.

Enterprise Security
Role-based access, encrypted records, access matrix, and immutable audit trails on every view and change.

Local Team, Cloud Scale
AWS-hosted SaaS with implementation, training, and support delivered by a Philippine-based team.

K-12 through graduate school on one platform. Grade school, junior and senior high, college, and graduate programs run side by side — each with its own calendar, grading system, and sectioning rules.

02 PLATFORM CAPABILITIES

Every office, every workflow.
One source of truth.

MODULE 01**Admissions & Applicant Tracking**

Online application intake, requirements tracking, interview panels, entrance testing, evaluation, ranking, and reservations.

MODULE 02**Enrollment & Registration**

Student advising, registration with instant sectioning and conflict checks, add/drop/change, and Certificates of Registration.

MODULE 03**Registrar Records**

Student profiles, curriculum, transcripts, report cards, certifications, ID card printing, and graduation candidate logs.

MODULE 04**Scheduling & Sectioning**

Class schedules, section management, split/merge tools, room and building assignments, and faculty loading.

MODULE 05**Grade Management**

Class record setup, grade encoding and review, summary of grades, incomplete grades, and audited grade corrections.

MODULE 06**Scholarships & Subsidies**

Scholarship applications, approvals, renewals, discount management, and government subsidy processing.

MODULE 07**Student, Parent & Faculty Portals**

Schedules, grades, balances, announcements, and surveys — self-service access on any device, from day one.

MODULE 08**Billing & Treasury Integration**

Enrollment assessments and student ledgers pushed to cashier counters and finance in real time.

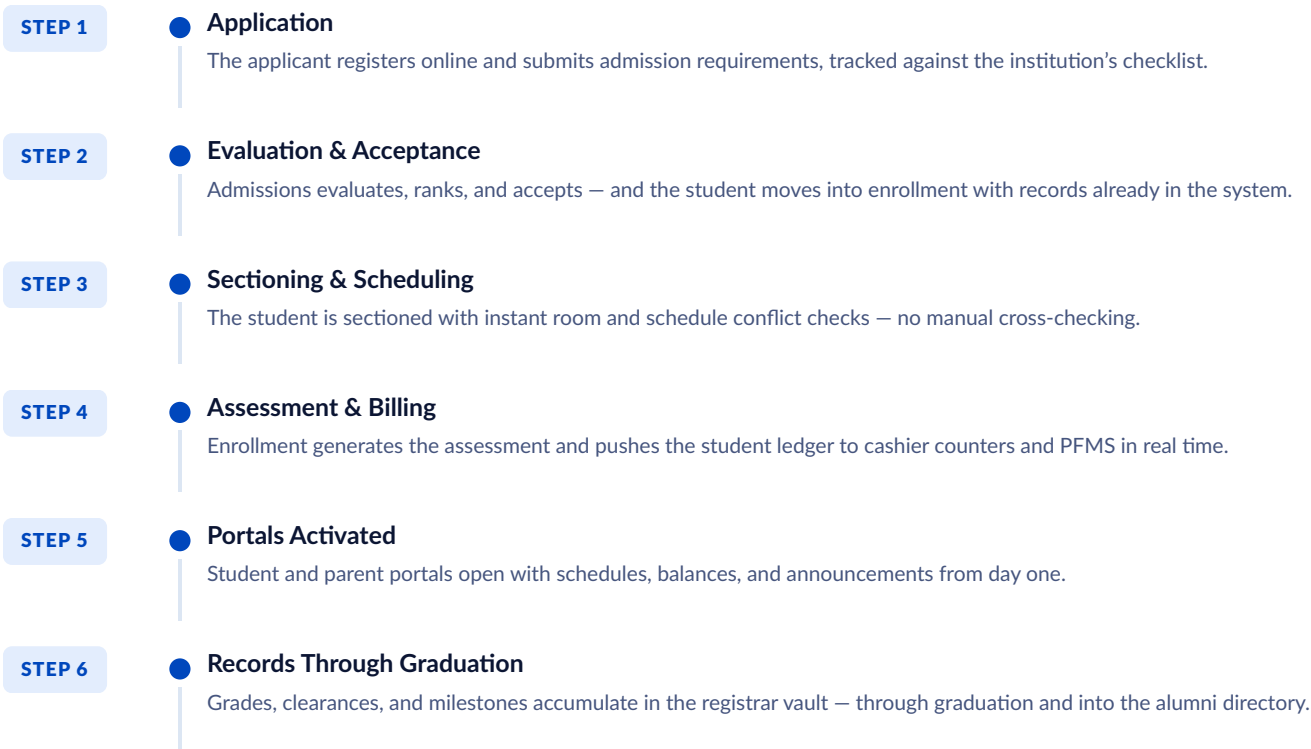

MODULE 09**Reports & Compliance**

DepEd, CHED, and UniFAST formats, exam permits, and an ad-hoc report builder — generated on demand.

And the operations around them. Campus events and PTC scheduling, clearance management, employee center, security with access matrix and audit trails, and a setup manager for campuses, colleges, programs, and enrollment policies.

03 THE STUDENT JOURNEY

From applicant to alumni, without the queues

The problems it retires

Fragmented Records

No more conflicting versions of the same student across spreadsheets.

Queue-Heavy Enrollment

No more manual sectioning keeping students in line and staff on overtime.

Report Season Crunch

No more assembling DepEd, CHED, and UniFAST submissions by hand.

Walk-In Dependency

No more office visits just to see schedules, grades, or clearances.

Peak enrollment, visible end to end. Applicant pools, paid registrations, notices of acceptance, and enrollee counts are tracked live per program and per term — so leadership sees the funnel while it is still moving.

04 COMPLIANCE & SECURITY

Built for Philippine institutions, secured to enterprise standards

Regulatory alignment

DepEd Structured report generation in the formats basic education institutions prepare.

CHED Higher education compliance reporting produced from live enrollment and academic records.

UniFAST Subsidy and free-tuition reporting support for participating institutions.

NPC Data privacy practices aligned with the National Privacy Commission through RBAC and audit logging.

Philippine-first by design

PRIISMS is built around Philippine academic structures — semestral and trimestral calendars, sectioning practices, and clearance workflows — rather than adapted from a foreign template. Grading systems and enrollment policies are configured to your institution during implementation.

Enterprise-grade security controls

- **Role-based access** scoped to office, department, and function via a configurable access matrix.
- **Encrypted student records** in a centralized registrar vault.
- **Immutable audit trails** for record views, changes, and grade corrections.
- **Portal isolation** — student and parent accounts separated from back-office functions.
- **Password policy controls** and centralized user and group administration.
- **AWS cloud infrastructure** with elastic capacity and high availability.

Accountability on every record

Every view and every change is written to an immutable audit log — supporting internal audit, accreditation review, and data privacy accountability without additional preparation.

Multi-campus by design. Campuses, colleges, programs, majors, academic terms, rooms, and enrollment policies are all administered centrally from one Setup Manager — no per-campus silos.

05 THE SMART CAMPUS ECOSYSTEM

The academic core of a connected campus

PFMS Online

FINANCIAL MANAGEMENT HUB

Enrollment assessments and student ledgers synchronize directly to accounting AR subsidiary ledgers — finance works from the same record as the registrar.

PMAPS Online

HR, ATTENDANCE & PAYROLL HUB

Approved class schedules feed faculty workload computation and payroll adjustments automatically.

Sophie - Learning OS

VIRTUAL CLASSROOM & ASSESSMENT SUITE

Enrollment rosters provision virtual classrooms; assessment results return to the registrar gradebook.

DocSR

ONLINE DOCUMENT REQUEST

Registrar records back online document requests — from transcripts to certifications — with payment and claim scheduling.

Deployment model

Cloud SaaS

Hosted on AWS infrastructure — no servers to buy or maintain.

Any Browser

Secure HTTPS access; portals are mobile-responsive.

Multi-Campus

Campuses, colleges, and programs administered centrally.

Always Current

Continuous updates without disrupting the academic term.

Local Support

Implementation, training, and support by a PH-based team.

Executive visibility included. Leadership dashboards track enrollment funnels from applicant pool to paid registration, program statistics, and term-over-term trends — live, not month-end.

06 INSTITUTIONAL FIT

One platform for every level of education

BASIC EDUCATION

K-12 Schools

Grade school through senior high with DepEd-aligned reporting, sectioning, and report cards.

HIGHER EDUCATION

Colleges & Universities

Semestral and trimestral calendars, curriculum management, CHED and UniFAST compliance.

PUBLIC SECTOR

State Universities & Colleges

Multi-campus administration, subsidy processing, and audit-ready records for public accountability.

SPECIALIZED

Training Institutions

Program-based structures with flexible terms, assessments, and certification issuance.

Common questions

Can PRIISMS handle both basic and higher education structures?

Yes. K-12 schools, colleges, universities, and state institutions run on PRIISMS — configured to each institution's academic calendar, grading system, and sectioning rules during implementation.

Does enrollment data reach our finance office automatically?

Yes. Assessments and student ledger entries push to cashier counters and synchronize with PFMS in real time, so finance works from the same record as the registrar.

What do students and parents see?

Dedicated portals provide schedules, grades, balances, and announcements — reducing walk-in traffic to the registrar and finance offices.

How are our records protected?

Access is role-based, records are encrypted, and every view or change is written to an immutable audit log — on secure AWS cloud infrastructure.

Implemented, trained, and supported locally. PrinceTech's Philippine-based team handles configuration, data migration, training, and ongoing technical support — one accountable partner from kickoff onward.

Since 1997, Prince Technologies Corporation has helped Philippine educational institutions unify academic, financial, HR, payroll, and learning operations in **one secure, cloud-based ecosystem.**

01 Education-Focused

Built around the operational realities of Philippine schools, colleges, and universities.

02 Integrated by Design

Academic, financial, HR, payroll, and learning systems share one connected record.

03 Accountable & Auditable

Role-based controls, traceable transactions, and structured audit records.

04 Local Support

A Philippine-based team that understands local institutional requirements.
